

Simple guide for fast printing files from computers

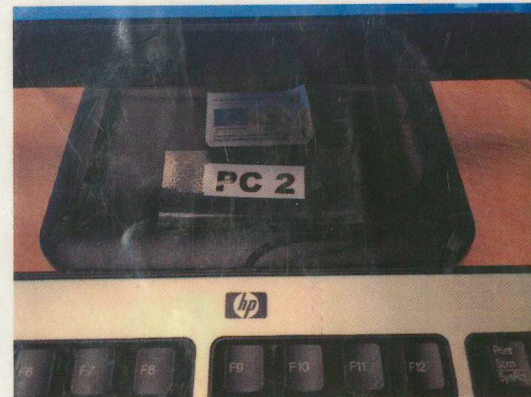

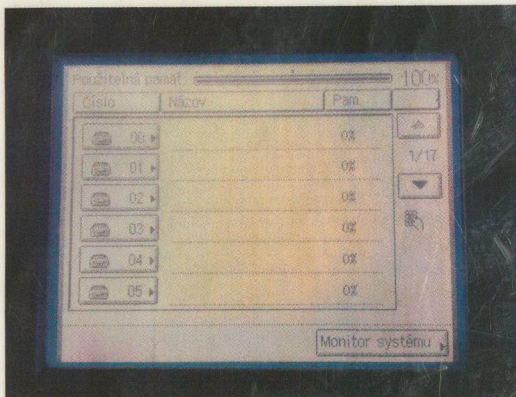

Important note before printing:

!!! Computers on the left side of the room are connected to a printer on the left side and vice versa !!!

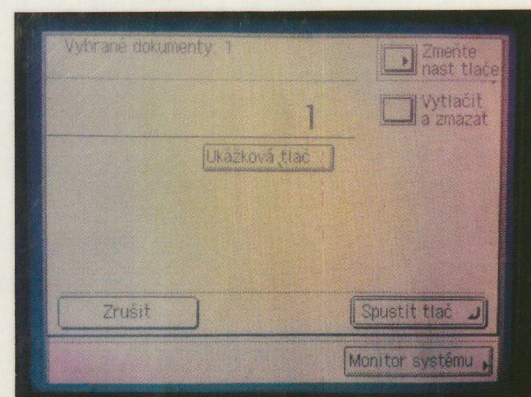

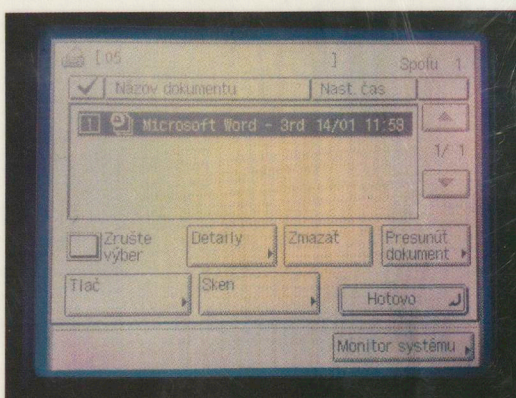

1. Put „Print Card“ or your „ISIC Card“ on the left side of printer into the card holder. **(Do not remove the card while printing)**. Press the button „MAIL BOX“ above the printer display.

2. Choose the number of the computer you used to print your file. Number can be seen on a computer monitor (for example PC no. 2).

3. Manually select and touch the file/files you want to print. Then press button „Tlač“ (Print) and „Spustiť tlač“ (Start printing). Wait to finish printing.

4. **Only after the printing take out „Print card“ from the printer !**
