

Dear students,

no transfers between study groups within the subject Pathological Anatomy, which are not officially approved by the study department, **will be accepted. The student is obliged** to complete practical lessons with the study group to which she/he is assigned. **The assigned study group is the same for subjects from each year.**

If a student has enrolled in two subjects, that take place at the same time for a given year, **she/he must decide** on one that she/he will complete in the given AY.

For exceptional cases, which will be assessed individually, and **for all Erasmus students, an individual practical lesson is set aside in the schedule.**

Please respect this decision.

Team of the Institute of Pathology, Faculty of Medicine, UPJŠ
