

SYLABUS

Subject:	<i>Conservative Dentistry I</i>		
Study programme:	<i>Dental Medicine</i>	Semester:	<i>6. semester</i>
Valuation:	<i>absolved</i>	Obligation:	obligatory
Number of hours:	<i>1 h.lectures and 3 h.practicals / week</i>		<i>56 hours</i>

Place: Department of stomatology and Maxillofacial Surgery and Akademia Košice n.o.

1 st Department of Stomatology

Department of stomatology and Maxillofacial Surgery

Lectures: Tuesday OTW PE 11:45-13:15

<i>Week</i>	<i>Lectures NVT /OTW/</i>	Practice
1.	Introduction to cariology and basics of dental caries epidemiology. Dental caries and its management. Theories of the onset of the dental caries. 14.2.2023	Introduction to cariology, dental caries and its management. Examination and treatment of the patient. Evaluation of knowledges
	Introduction to cariology and basics of dental caries epidemiology. Dental caries and its management. Theories of the onset of the dental caries.	Introduction to cariology, dental caries and its management. Examination and treatment of the patient. Evaluation of knowledges
2.	Aetiology of tooth decay processmikroorganisms, nutrition. Saliva – its properties, function. Oral hygiene. 28.3.2023	Aetiology of tooth decay process, nutrition, mikroorganisms. Examination and treatment of the patient. Evaluation of knowledges
	Aetiology of tooth decay processmikroorganisms, nutrition. Saliva – its properties, function. Oral hygiene.	Aetiology of tooth decay process, nutrition, mikroorganisms. Examination and treatment of the patient. Evaluation of knowledges
3.	Pathomorphology of dental caries, carious process in enamel and dentine. Defence mechanisms against carious process – remineralisation, sclerotic dentine, transparent dentine. 14.3.2023	Pathomorfological picture of dental caries. Examination and treatment of the patient. Evaluation of knowledges
	Pathomorphology of dental caries, carious process in enamel and dentine. Defence mechanisms against carious process – remineralisation, sclerotic dentine, transparent dentine.	Defence mechanisms against carious process – sclerotic dentine, transparent dentine. Examination and treatment of the patient. Evaluation of knowledges
4.	Clinical classification of dental caries. Non – carious tooth defects – erosion, abrasion, attrition,traumatic. 28.3.2023	Clinical classification of dental caries. Examination and treatment of the patient. Evaluation of knowledges

SYLABUS

	Clinical classification of dental caries. Non – carious tooth defects – erosion, abrasion, attrition,traumatic.	Non – carious tooth defects. Examination and treatment of the patient. Evaluation of knowledges
5.	Principles of treatment of dental caries – the objectives of restoring teeth, the basic working principles acording G.V.Black, principles of cavity preparation, preparation techniques according to the used dental material. 11.4.2023	Principles of dental caries treatment, basic preparation techniques according G.V.Black. Examination and treatment of the patient. Evaluation of knowledges
	Principles of treatment of dental caries – the objectives of restoring teeth, the basic working principles acording G.V.Black, principles of cavity preparation, preparation techniques according to the used dental material.	Principles of dental caries treatmentpreparation techniques according to the used dental materials. Examination and treatment of the patient. Evaluation of knowledges
6.	Treatment of dental caries-pulp protection, materials used to protect pulp, classification, Calcium hydroxide and its role in cariology. 25.4.2023	Treatment of dental caries – pulp protection. Examination and treatment of the patient. Evaluation of knowledges
	Treatment of dental caries-pulp protection, materials used to protect pulp, classification, Calcium hydroxide and its role in cariology.	Calcium hydroxide and its role in cariology. Examination and treatment of the patient. Evaluation of knowledges
7.	Treatment of dental caries –plastic fillings, amalgams, properties, indication, inserting, carving, polishing. 9.5.2023 TEST FOR LECTURES	Treatment of dental caries – plastic fillings. Examination and treatment of the patient. Evaluation of knowledges
	Treatment of dental caries –plastic fillings, amalgams, properties, indication, inserting, carving, polishing.	Treatment of dental caries – amalgams. Examination and treatment of the patient. Evaluation of knowledges

Specific conditions for passing the subject:

Completion of 100% participation in practical exercises and lectures. Continuous review with a record of assessment during clinical teaching. Passing a test from lectures with a minimum rating of 60%.

Final test with a grade of at least 60%.

SYLABUS

Theoretical knowledges - under contents of clinical practice

Important part is refernce about treated patient, his/her history, up to now treatment and about precedure which will be done by the student. In the case of lack of student's knowledges, student wil not exam and treat the patient

Written test – evaluation A – E (min. 60%)

Treatment procedures:

Complex examination of oral cavity and facial region of adult patient and treatment plan 14

Vital treatment of dental pulp – indirect pulp caping 8

Amalgam fillings 5

X-ray evaluation 15
