

Subject:	<u>Internal Medicine - Propedeutics</u>
Study Year:	3 rd year
Study Programme:	General Medicine
Term:	Winter term
Academic Year:	2023/2024

<i>Date</i>	Lectures - Tuesday 14.00-15.30 P 2	<i>Week</i>	<i>Plan of practices in internal propedeutics</i>
19.09.2023	Introduction to clinical medicine. History taking <i>prof. MUDr. I. Lazúrová, FRCP, DrSc.</i>	1.	Medical documentation. Documentation management. Communication with the patient
26.09.2023	Inspection - part I. General inspection, consciousness, position, shape and size, skin inspection <i>prof. MUDr. L. Legáth CSc.</i>	2.	History taking – general and special questions in diseases of individual systems
03.10.2023	Inspection – part II. Special inspection focused on individual diseases <i>MUDr. M. Kozárová, PhD.</i>	3.	Inspection – how to proceed, what to notice. What does point to diseases of individual systems
10.10.2023	Palpation – the head, neck, chest (lungs and heart), abdomen. Palpation of the peripheral vessels, Examination of the pulse <i>MUDr. I. Valočiková, PhD.</i>	4.	Palpation of the head, neck and chest
17.10.2023	Main symptoms in the diseases of the GIT (liver, gallbladder, pancreas) and diseases of the kidneys and urinary tract <i>Doc. MUDr. Z. Schroner, PhD.</i>	5.	Palpation of the abdomen, examination of the ascites. Palpation of the peripheral vessels
24.10.2023	Percussion of the lungs, heart and abdomen – physiology and pathology <i>doc. MUDr. I. Dravecká, PhD.</i>	6.	Percussion of the chest and abdomen. Normal and pathological findings
31.10.2023	Auscultation of the lungs – physiological and pathological findings. Main symptoms in most frequent diseases (bronchitis, asthma, pneumothorax, pneumonia and pleuritis)	7.	Auscultation of the lungs. Diff. diagnosis of the auscultation findings

	<i>doc. MUDr. P. Joppa, PhD.</i>		
07.11.2023	Auscultation of the heart. Heart sounds and murmurs <i>doc. MUDr. J. Gonsorčík, CSc.</i>	8.	Auscultation of the heart - heart sounds and heart murmurs Examination of the pulse – assessment of qualities. Measurement of blood pressure
14.11.2023	Physical findings in the most frequent heart diseases (inspection, palpation, auscultation) <i>prof. MUDr. G. Valočik, PhD</i>	9.	Use of knowledge from inspection, percussion, palpation and auscultation in the differential diagnosis of heart diseases
21.11.2023	Principles of clinical electrocardiography - normal ECG, pathologic changes, myocardial hypertrophy, electrolyte disturbances <i>prof. MUDr. P. Mitro, PhD.</i>	10.	Basic principles of electrocardiography - physiological ECG
28.11.2023	ECG – coronary heart disease, acute myocardial infarction, pulmonary embolism, pulmonary heart disease, myocarditis, pericarditis <i>prof. MUDr. P. Mitro, PhD.</i>	11.	Pathological ECG findings - coronary heart disease, angina pectoris and acute myocardial infarction. ECG in ventricle hypertrophy, electrolyte disturbances, pericarditis and endocarditis
05.12.2023	ECG – arrhythmias <i>prof. MUDr. D. Pella, PhD.</i>	12.	Cardiac arrhythmias
12.12.2023	Basic principles of X-ray in internal medicine. X-ray of the chest – pathological findings <i>prof. MUDr. G. Valočik, PhD.</i>	13.	X-ray in internal medicine. Physiological and pathological findings.
19.12.2023		14.	Complete examination of the patient with writing a medical history Theoretical examination within the test

Doc. MUDr. I. Dravecká, PhD.
internal medicine teaching coordinator
for general medicine

Conditions for course completion:

1. For successful completion of the practical exercises/seminars is required:

- To participate at all of practical exercises, theoretical and practical performance of all exercises/seminars, it is possible to complete practical exercises in the Center for Simulator Teaching
- To get at least 60 % of total score for ongoing review of written test /30 questions/ and the theoretical training to practical exercises.
- Two absences are allowed /justified/

2. For successful obtained of the credits from subject is necessary:

- To gain the credit from practical exercises (paragraph 1 above).
- The final exam consists of oral parts
- Evaluation: Study rules of procedure UPJŠ in Košice, the Faculty of Medicine, Part II, Art13
- The final classification includes the evaluation of the written test and the results obtained in practical exercises
- To the exam bring the student's book with the appreciation /patient/
- For the pre-term, a teacher's recommendation is required based on the student's active approach, excellent theoretical and practical knowledge and passing the test with at least 90%
