

DERMATOVENEROLOGY EXAM QUESTIONS – Dental Medicine

1. Anatomy of the skin, the skin appendages and physiology of the skin
2. Primary skin lesions, examples of diseases
3. Secondary skin lesions, examples of diseases
4. Configuration of skin lesions, examples of diseases
5. Distribution of skin lesions, examples of diseases
6. Mechanical, thermal and chemical damage of skin
7. Phototraumatic dermatosis. Phototoxic dermatosis. Photoallergic dermatosis. Radiodermatitis
8. Parasitic skin diseases (scabies, pediculosis, larva migrans)
9. Mycoses of the skin (Tinea corporis) - methods of investigation, therapy
10. Fungal nail and foot infection, methods of investigation, therapy
11. Mycoses of the face and scalp (Tinea faciei, Tinea capitis), methods of investigation, therapy
12. Superficial mycosis - Pityriasis versicolor
13. Superficial mycoses - Piedra alba, Piedra nigra, Tinea nigra
14. Erythrasma
15. Candidosis intertriginosa, Candidosis paronychii et onychii
16. Stomatitis candidomycetica. Vulvovaginitis and balanitis candidomycetica
17. Impetigo contagiosa streptogenes, staphylogenes, Ecthyma
18. Folliculitis, furuncle, carbuncle
19. Hidradenitis suppurativa
20. Erysipelas, Cellulitis
21. Cutaneous tuberculosis
22. Warts and genital warts, Epidermodysplasia verruciformis, Molluscum contagiosum
23. Herpes simplex, Eczema herpeticum
24. Herpes zoster
25. Irritative contact dermatitis acute and chronic
26. Allergic contact dermatitis, methods of investigation, important allergens
27. Nummular (microbial) eczema, Eczema dyshidroticum
28. Atopic dermatitis (etiopathogenesis, clinical features, diagnostic criterias, therapy, prevention)
29. Seborrheic dermatitis in adulthood, in children
30. Drug eruptions (etiopathogenesis, hypersensitivity reactions, clinical picture, management of the patient with drug allergy, diagnosis, therapy)
31. Urticaria, angioedema (etiopathogenesis, immunological and non-immunological types, diagnosis, therapy)
32. Pruritus and Prurigo (Prurigo simplex acuta, Prurigo subacuta, Prurigo chronica, Prurigo nodularis Hyde)
33. Lichen simplex chronicus
34. Psoriasis vulgaris (etiopathogenesis, clinical picture and therapy)
35. Types of psoriasis (clinical picture and therapy)
36. Parapsoriasis en plaques, small-patch and large-patch parapsoriasis
37. Lichen (ruber) planus, oral lichen planus.
38. Pityriasis rosea Gibert,
39. Pityriasis lichenoides acuta et chronica
40. Pemphigus (clinical types, investigations, immunofluorescence, therapy)
41. Pemphigoid (clinical types, investigations, immunofluorescence, therapy)
42. Dermatitis herpetiformis Duhring, Linear IgA dermatitis
43. Erythema exsudativum multiforme, toxic epidermal necrolysis (Lyell ´s syndroma)
44. Epidermolysis bullosa (clinical types, diagnosis, management)
45. Erythroderma (etiopathology, clinical picture, differential diagnosis, investigations, therapy)
46. Erythema nodosum
47. Scleroderma (localized scleroderma, systemic scleroderma)

48. Dermatomyositis
49. Discoid lupus erythematosus (DLE)
50. Granuloma anulare, Necrobiosis lipoidica
51. Sarcoidosis
52. Disorders of the pigmentation (depigmentations and hyperpigmentations of the skin)
53. Hair disorders (alopecia, Pseudopelade Brocq, androgenetic alopecia, hypertrichosis)
54. Nail disorders (clinical pictures, manifestations of skin diseases on the nails)
55. Acne vulgaris– etiopathogenesis, clinical findings. Special types of acne, prevention, therapy
56. Rosacea, Perioral dermatitis
57. Allergic (hypersensitivity) vasculitis
58. Chronic venous insufficiency. Leg ulcers – differential diagnosis
59. Obligate precancerosis. Epidermal and adnexal naevi, Melanocytic naevi
60. Bowen ´s disease, Morbus Paget. Erythroplasia of Queyrat
61. Carcinoma basocellulare
62. Carcinoma spinocellulare
63. Adnexal and mesenchymal tumors, seborrhoeic keratosis
64. Morbus Hodgkin, Mycosis fungoides, Syndroma Sézary.
65. Malignant melanoma (clinical types, diagnosis, management)
66. Vascular naevi and tumors
67. Mastocytosis - etiology, pathogenesis, clinical picture. Urticaria pigmentosa
68. Syphilis, etiology, basic classification, microscopical and serological diagnosis of syphilis, therapy
69. Primary syphilis, clinical picture, localization, differential diagnosis
70. Secondary syphilis, clinical picture, differential diagnosis
71. Tertiary syphilis, manifestation on the skin, mucosae, and internal organs
72. Congenital syphilis (Syphilis connata praecox, Syphilis connata tarda)
73. Gonorrhoea in man (microscopical diagnosis, therapy, criteria of cure)
74. Gonorrhoea in woman (microscopical diagnosis, therapy, criteria of cure)
75. Chancroid (ulcus molle)
76. Lymphogranuloma venereum
77. Granuloma inguinale
78. Trichomoniasis
79. Non-gonococcal urethritis/cervicitis
