

## **Notice**

The neurology II. exam is held in the form of a test in the first and second terms. In case of failure, the third term is an oral exam. The ROGO test consists of 70 questions, each with 4 possible answers. The correct answers can be 0 to 4, and each is evaluated separately as a correctly or incorrectly given individual answer. The minimum number of correct answers for the exam (grade E) is 60%.
