

CURRENTLY SOLVED DOCTORAL THESES

Title: Epidemiological study of the occurrence of selected tick-borne diseases in the context of climatic and ecological changes in the human population.

PhD student: Mgr. Antónia Lamiová

Study program: Epidemiology

Form of study: full-time (2024-2028)

Supervisor: prof. MVDr. Monika Halánová, PhD.

consultant: MUDr. Zuzana Kalinová, PhD.

Title: Epidemiological and clinical aspects of nosocomial infections in critically ill children

PhD student: MUDr. Pavol Fedor

Study program: Epidemiology

Form of study: external (2022 – 2027)

Supervisor: doc. MUDr. Ingrid Urbančíková, PhD., MPH

Title: Active surveillance of carbapenemase-producing enterobacteria in the conditions of a university hospital.

PhD student: Mgr. Ladislav Tomčo, MPH

Study program: Epidemiology

Form of study: external (2021 – 2026)

Supervisor: Prof. MVDr. Monika Halánová, PhD.

Title: Oral health, cardiovascular risk factors and coronary angiographic findings

PhD student: MDDr. Jakub Jánošík, MPH

Study program: Epidemiology

Form of study: external (2021 – 2026)- interrupted study

Supervisor: Prof. MVDr. Monika Halánová, PhD.

Specialist Supervisor trainer: Prof. MUDr. Daniel Pella, PhD.

Title: Epidemiology and ecology of tick-borne encephalitis in Slovakia

PhD student: MVDr. Tomáš Molčanyi

Study program: Epidemiology

Form of study: external (2020 – 2025)

Supervisor: MUDr. Zuzana Kalinová, PhD.

Title: Multiresistant enterobacteria in clinical material

PhD student: Mgr. Mária Nagyová

Study program: Epidemiology

Form of study: external (2017 – 2021) – interrupted study

Supervisor: Prof. MVDr. Monika Halánová, PhD.

Title: Contribution of GLP-1 receptor agonists in the prevention and treatment of cardiovascular events in obese patients: an epidemiological study in Slovakia

PhD student: MUDr. Katarína Babíková

Study program: Epidemiology

Form of study: external (2025–2030)

Supervisor: Prof. MVDr. Monika Halánová, PhD.
