

SAVE THE DATE Hands-on Training Workshop on Flow Cytometry

The *Slovak national node for EATRIS* and Biomedical Centre Martin, Jessenius Faculty of Medicine in Martin, Slovakia is excited to announce a pilot, 2-day hands-on training workshop on flow cytometry.

The course is aimed at providing practical exposure to basic principles and protocols for cell analysis for beginners.

No previous experience in flow cytometry is needed!

Venue: Laboratory of flow cytometry, cell phenotyping and engineering, Biomedical Centre Martin - BioMed Martin, Jessenius Faculty of Medicine in Martin, Mala Hora 4, 036 01 Martin, Slovakia

Date: 20–21 August, 2026

Language: English

Target group: graduate students, PhD students, post docs

Participants will gain introduction to basic principles of flow cytometry and hands-on training in flow cytometry analysis using the FACS ARIA BD BIOSCIENCES system. The real cancer cell line PANDA, developed in our lab and derived from pancreatic ductal adenocarcinoma (one of the most aggressive human tumors) will be used for training. Please note: To ensure a practical approach, we will accommodate up to 7 participants for this workshop.
