

Subject: CHEMISTRY OF DENTAL MATERIALS

Study year, term: I., winter (WT)

Study programme: Dental Medicine

I. Requirements for successful completion of the practical exercises and seminars:

- **Mandatory 100% participation in practical exercises/seminars**, theoretical and methodical mastery of practical exercises.
- Evaluation of **at least 50% in the revision test on the topics of practical exercises, seminars, and calculations** (see [Lectures and practical exercises](#)).

The preliminary examination is conducted during the practical exercises on the given week's topic (small tests or oral examinations within seminars; see [Lectures and practical exercises](#)).

In the case of an excused absence, the student will prepare a seminar paper on the designated topic according to the teacher's instructions, which will be presented in the 14th week of the semester at the practical exercise as a presentation (pptx, duration 5-10 minutes).

II. Requirements for successfully obtaining the credits (a prerequisite for enrolling in a subsequent subject):

- Successful completion of practical exercises (see point I).
- An **average grade of at least 60%**, calculated from two revision tests on lecture topics (15 open-ended questions) scheduled for the semester and one revision test on the topics of exercises, seminars and calculations (see [Lectures and practical exercises](#)).

A student who, in the event of an excused absence, does not participate in a maximum of 1 revision test on the regular date **must take the missing test** in the last week of the winter semester.

A rating of **at least 50% on individual tests** and an average rating of at least 60% at the same time can be considered passing the exam, with a result corresponding to the scale below. If the student disagrees with the rating, he must take the written exam.

A student who **does not score at least 50% on the individual tests** must take a written exam, even if they achieve an average of at least 60%. Examples of evaluation of a student who must take a written exam:

1st revision test 40%, 2nd revision test 90%, 3rd revision test 70%, average 67%,
1st revision test 49%, 2nd revision test 71%, 3rd revision test 60%, average 60%,
1st revision test 49%, 2nd revision test 49%, 3rd revision test 49%, average 49%.

The written exam consists of 25 open questions in the scope of the subject given by the curriculum.

- The student has 60 minutes to work on the questions.
- After completion, the written answers are evaluated by the teachers of the Department,
- Based on the quality of the answer, the student gets 0-4 points for answering each question (the maximum number of points is 100).
- The final evaluation of the exam is according to the following scale:

The final achieved points - %	Mark	
100 – 91	1	<i>excellent</i> A
90 – 84	1-	<i>very good</i> B
83 – 75	2	<i>good</i> C
74 – 68	2-	<i>satisfactory</i> D
67 – 60	3	<i>sufficient</i> E
< 60	4	<i>failed</i> Fx

The final assessment considers the results of the revision tests and the results achieved in practical exercises and seminars.

Students are obliged to comply with the UPJS Faculty of Medicine [Study Rules and Regulations](#), [Disciplinary Rules of Procedure](#) and other internal [basic documents](#) (Legislation and internal regulations and Study rules) of the UPJS Faculty of Medicine.
