

SYLLABUS

Subject:	Microbiology 2 TUESDAY 12.30-14.00 P3		
Study Programme:	<i>Dental Medicine</i>	Study Period:	WS
Evaluation:	<i>examination</i>	Subject Type:	
Content:	2/2 E		Total 28/28

Work place: Department of Medical and Clinical Microbiology UPJS and UNLP

<i>Week</i>	<i>Lectures</i>	<i>Practical Lessons</i>
1. 15.9.	Gramnegative bacteria of relevance to dentistry (classification,-description of agents, - pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Assoc. prof. Čurová	Laboratory diagnosis of staphylococci (collection, transport and processing the specimens, - smears, - cultivation, - methods for identification: catalase test, coagulase test, - serology and typing tests, - sensitivity to antibacterial drugs – AB)
2. 22.9.	Mycobacteria and Corynebacteria (classification,-description of agents, - pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Prof. Siegfried	Laboratory diagnosis of streptococci, enterococci and pneumococci - Test 1 (collection, transport and processing the specimens, - smears, - cultivation, - methods for identification: catalase test, optochin test, - serology and typing tests, - sensitivity to AB)
3. 29.9.	Anaerobic bacteria (classification,-description of agents, - pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Assoc. prof. Čurová	Lab. diagnosis of enterobacteria - Test 2 (collection, transport and processing the specimens, - bacteriological methods for isolation of enterobacteria (enrichment cultures, selective medium cultures, differential medium cultures, final identification), - serology methods: rapid slide agglutination test, tube dilution agglutination test-Widal test, - demonstration the sensitivity of bacteria to AB)
4. 6.10.	Fungi of relevance to dentistry (classification,-description of agents, - pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Dr. Hrabovský	Laboratory diagnosis of corynebacteria and mycobacteria - Test 3 (collection, transport and processing the specimens, - smears (Ziehl-Neelsen staining method for mycobacteria, Neisser staining method for corynebacteria, - culture, identification of acid-fast organisms in sputum specimen, demonstration the sensitivity of bacteria to AB)
5. 13.10.	Medical parasitology (classification,-description of agents, - pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Dr. Sabol	Laboratory diagnosis of sporulating aerobe and anaerobe bacteria - Test 4 (collection, transport and processing the specimens, - direct examination and interpretation of smears, -methods for inoculation and isolation, - anaerobic culture media, - demonstration of sensitivity of bacteria to AB)
6. 20.10.	DNA viruses (classification,-description of agents, - pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Assoc. prof. Čurová	Laboratory diagnosis of infections caused by fungi - Test 5 (collection, transport and processing of specimens, - smears, -methods for isolation and identification (auxanogram and zymogram), serologic methods,- demonstration of sensitivity of fungi to antimycotics)

SYLLABUS

7. 27.10.	RNA viruses (classification,-description of agents, -pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Assoc. prof. Čurová	Laboratory diagnosis of infections caused by parasites - Test 6 (collection, transport and processing of specimens, -direct examination and interpretation of smears, -methods for isolation and identification, - serology)
8. 3.11.	Infectious agents causing sexually-transmitted and urinary tract infections (classification,-description of agents, -pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Prof. Siegfried	Laboratory diagnosis of infections caused by viruses - Test 7 (collection, transport and processing of specimens, -methods for cultivation of viruses, - detection of viruses, - serology)
9. 10.11.	Infections agents causing respiratory infections (classification,-description of agents, -pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Prof. Siegfried	Seminar - Test 8 Review of medically important viruses. Presentation of written work prepared by students based on self directed study.
10. 17.11.	Infectious agents causing cardiovascular and central nervous system infections (classification,-description of agents, -pathogenicity, -clinical infections, diagnostic laboratory tests, -treatment, -prevention and control) Assoc. prof. Čurová	Laboratory diagnosis of sexually transmitted and urinary tract infections - Test 9 (collection, transport and processing of specimens, -direct examination and interpretation of smears, -methods for isolation and identification, - serologic tests, - demonstration of sensitivity of bacteria to AB)
11. 24.11.	Microbiology of dental plaque and dental carries (causative agents of dental plaque, etiology of caries, invasion of dentin and pulp by bacteria, prevention of dental caries) Dr. Sabol	Laboratory diagnosis of respiratory infections - Test 10 (collection, transport and processing of specimens, -direct examination and interpretation of smears, -methods for isolation and identification, - serologic tests, - demonstration of sensitivity of microbes to AB)
12. 1.12.	Infectious agents causing periodontal diseases (classification and etiology, pathogenicity, clinical syndromes, diagnostic laboratory tests, -treatment, -prevention and control) Dr. Sabol	Laboratory diagnosis of gastrointestinal diseases (collection, transport and processing of specimens, -direct examination and interpretation of smears, -methods for isolation and identification, - serologic tests, - demonstration of sensitivity of microbes to AB)
13. 8.12.	Extra-oral infections caused by oral bacteria Credit test (dentogenic abscess, actinomycosis, infectious endocarditis, bacteremia) Assoc. prof. Čurová	Laboratory diagnosis of infectious agents causing meningitis and sepsis (collection, transport and processing of specimens, -direct examination and interpretation of smears, -methods for isolation and identification, - serologic tests, - demonstration of sensitivity of microbes to AB)
14. 15.12.	Retake the credit test A topic according a request of students. Assoc. prof. Čurová	Credit week. Compensation of practical exercises.

Conditions to be fulfilled for getting the credit

1. 60 % of 60 points a student may obtain in the credit test.
2. 60 % of 100 points a student may obtain in 10 short tests (each test contains 10 questions, 1 question = 1 point) written in practical exercises starting from the 2nd up to the 11th week of winter semester.
3. Presentation of Seminar Work.
4. Active participation in practical lessons (demonstration the knowledge related to topics of given practical lesson).

MUDr. Eva Schréterová, PhD.
Head of the Institute
doc. RNDr. Katarína Čurová, PhD.
Deputy Head for Education
