Information for GM students

Possibility of retake credit test in pathology also for students who want to improve the achieved average result from three credit tests in winter term 2019/2020

We announce to students that, at the request of students studying in the Erasmus program, we are extending the opportunity to write a retake credit test in pathology for all students as follows:

- not only students who have achieved on average less than required minimum of 60% of the three credit tests written during the winter term
- but also students who have met the credit limit (at least 60% on average of three midterm credit tests) however want to improve their results.

The final evaluation is given by the percentages achieved in the last test written.

We announce to students who have met the credit limit but want to write a retake credit test to get a better result that it is inevitable to announce this interest by the end of December 2019 by e-mail at erika.stammova@upjs.sk to order the necessary number of tablets for a test.

Data of retake tests:
- 1st retake credit test will take place on Friday 17.1.2020 in P1 lecture hall
- 2nd retake credit test will take place on Friday 31.1.2020 in P1 lecture hall
Both retake tests – depending on the number of students – will be written in one or two time intervals: 8:00-9:30 and 9:40-11:10.

We will announce the precise time of the test in January when it will be known how many students come to write the test.

MUDr. Erika Štammová
Deputy Head for Education
