

General Information			
Course name and code	Animal and Human Ecophysiology ÚBEV/EFZ1/03	ECTS Credits	6
		Semester	1st (Winter) Master & Doctoral Degree
Aims			
<p>The aim of lectures is to provide students with knowledge of adaptations to environmental factors and how do animals and humans cope with extreme environmental effects.</p>			
Contents			
<p>Environmental factors, reaction, adaptation, deformation. Biological rhythms. Stress reaction - general adaptation syndrom. Physiology and pathology of adaptation mechanisms - fever, pain, inflammation, apoptosis, necrosis. Aging. Regulation of food intake. Food adaptations, fasting, starvation, overfeeding. Thermoregulation. Hibernation, estivation, diapause. Adaptations to hypobaria and hyperbaria. Adaptations to hypergravity and microgravity. Electromagnetic fields. Biotransformation. Xenobiotics in air, water and soil. Drugs of abuse. Carcinogenesis, oncogenes, tumor suppressor genes. Cancer prevention. Prions.</p>			
Evaluation			
<p>Thesis elaboration, written test.</p>
