

Konferencia InPACT 2018 V Porte

V dňoch 5.5. – 7.5.2018 sme sa zúčastnili konferencie [International Psychological Applications Conference and Trends \(InPACT\) 2018](#) v Porte (Portugalsko). Prezentované boli výsledky našich výskumov formou orálnych ako aj posterových prezentácií.

Naše príspevky ([zborník príspevkov](#)) :

Oľga Orosová – The factors associated with the change in smoking status among Slovak schoolchildren (orálna prezentácia)

Bohuš Hajduch – Factors related to life satisfaction. Relationship between life satisfaction and emigration intentions among university students (orálna prezentácia)

Marta Kulanová – Resilience, risk-taking and students' emigration intentions in the context the Health Belief Model (orálna prezentácia)

Posterové prezentácie:

Anna Janovská – Factors linked to self-harming behaviour among adolescents (poster)

Marcela Štefaňáková – Effectiveness of the program Unplugged on descriptive normative beliefs among Slovak schoolchildren (poster)

Beáta Gajdošová – Fidelity, selected intra/interpersonal factors and effectiveness of universal drug prevention program (poster)

Ondrej Kalina – Do parents-child processes mediate the role of self-esteem on health risky behaviours among young Slovak adolescents? (poster)
