

AR Anatomy for students

Dear students,

New mobile virtual application **for the study of Anatomy** is now available using the link and after registration on the website of Pavol Jozef Šafárik University Faculty of Medicine:

<https://www.upjs.sk/en/faculty-of-medicine/department/medical-informatics/services/aranatomy/>

This educational application allows you to view the details of the human body directly on your mobile device (Android or iOS).

Students in the 1st and 2nd years of study (GM, DM with the enrolled subject "Anatomy" for this academic year) can register and obtain a license code for using this application during the study of anatomy. Combining both 3D animation and augmented reality provides a unique view inside the human body.
