Requirements for completion

Department of Medical and Clinical Biochemistry

Subject: **MEDICAL BIOCHEMISTRY 2**

Year of study, Term: **II., SS**

Study programme: **General Medicine**

1. **For successful completion of the practical exercises from Medical Biochemistry 2 is required:**
   - To participate at all of practical exercises, theoretical and practical performance of all exercises.
   - To get at least 60 % of total score for ongoing review of the theoretical training to practical exercises.
   - Monitoring is done at every practice from topics related to the exercise of the week – small tests or oral examination.
   - In the case of excused absence practice, student will prepare seminar work either in the form of PowerPoint presentation (10 - 15 min.) or in the written form (6 - 10 pages, used literature, Times New Roman 12, 1,5 line spacing). Supervisor will choose appropriate topic.
   - Successful completion of „colloquium“ – individual performance of selected theoretical and practical exercises in the last week of semester.

2. **For successful completion of the credits from Medical Biochemistry 2 is necessary:**
   - To gain the credit from practical exercises (paragraph 1 above).
   - To get at least 60 % (average) from 3 revision tests (big tests, 15 questions).
   - The result over 90 % on average from all of big tests written in winter and summer semester may substitute a written part of the exam (student need not to write a test on exam).
   - In the case of missed big test (maximum 1) or failure (less than 60 %) from the big tests, student can write credit test (the extent lectures of summer semester) in the last week of the semester.
   - In the case of the failure from the credit test in the last week of the semester, the head of the department will provide a date (only one) for the last repetition of the credit test in the summer semester.
   - The final exams consist of written test composed of 25 questions from the curriculum of Medical Biochemistry:
     - the tests are written in the assembly hall for 45 min.;
     - the tests are evaluated by teachers of the department;
     - each student receives for his/her answer from 0 (incorrect or no answer) to 4 points (fully correct answer) per question;
     - maximal number of points (= percentage) is 100 (%) for whole test;
     - the final mark for the written test is determined by the scale as follows:

     | The final achieved points (%) | Classification |
     |-------------------------------|---------------|
     | 100 – 90                      | excellent A   |
     | 89 – 82                       | very good B   |
     | 81 – 75                       | good C        |
     | 74 – 68                       | satisfactory D |
     | 67 – 60                       | sufficient E  |
     | < 60                          | fail Fx       |

   - Oral part consists of 3 randomly chosen questions from the pool of questions that each student may find on website: [http://www.upjs.sk/public/media/9648/Otázky ústna skúška_Medical Biochemistry_GM-14.pdf](http://www.upjs.sk/public/media/9648/Otázky ústna skúška_Medical Biochemistry_GM-14.pdf)
   - The final classification includes the evaluation of the oral part, written test and the results obtained in practical exercises.
